

Online hands-on training program on "Basics of Primer Designing" organized by VIT-TBI

The primers are a short stretch of oligonucleotides that impacts the entire DNA amplification process, both in-vivo and in-vitro. Proper primer designing and quality checking are essential for data analysis.

The virtual workshop will provide hands-on experience to the participants using different tools available for primer designing and its application on gene expression analysis.

Certificate will be given to the participants upon successful completion.
