

# Online hands-on training program on "Computer aided drug designing" organized by VIT-TBI

Computer-aided drug design (CADD) is a discipline that collects multiple chemical-molecular and quantum strategies with the aim of discovering, designing, and developing therapeutics primarily based on structure-activity relationship (SAR) approach.

The virtual workshop covers basics and provide online hands-on experience to the participants on drug designing using e-tools.

E-certificate will be given to the participants upon successful completion.
